I would like to discuss this, too.

In a message dated 8/5/2013 8:19:29 P.M. Central Daylight Time, ffbmayor@artelco.com writes:

Grace,

Attached is a commercial lease agreement between our two organizations that makes sense to me. Whatever we agree to will have to be presented to the City Council for concurrence. I don't anticipate a problem, but wanted to be sure you understand that. I have also copied our city attorney on this so that he can review it as your attorney is reviewing it.

I did send a copy of the layout. All of the equipment fit perfectly in the bar area and we still had room to build a lockable office/storage area. This should be a lower cost approach with a great look.

Regards,

Paul

Subject: RE: Agreements with Storytellers

I believe you could go ahead and negotiate terms and conditions of the contracts and explain our situation to them that they will not receive the signed contracts until after July 1, 2013. I would imagine that this is not an unusual circumstance for these storytellers to face. If necessary, I think we could negotiate a cost for them to reserve the date for us that would be applied to the performance contract when it is issued. I think that would be outside the spending agreement for their actual performance.

Mr. Anthony, do you have any suggestions for us?

Subject: Agreements with Storytellers

Mayor,

I have some concerns about how we go about finishing out the agreement with the two storytellers that have agreed via e-mail to come to Storyfest 13 (or IV, whichever we decide it will be called).

The Grant Application with the Arkansas Arts Council states that we cannot begin any expenditures or spending agreements until Jul 1, 2013. Now I realize that we have agreed in the City Budget and in the Community Club budget that there will be sufficient money to support the activity for two storytellers whether or not we receive the grant. However, since we've also stated that this money is to be used as part of the match for Storyfest, does that put the matching funds into the category of being part of the grant should we receive the grant? I'm not trying to throw roadblocks into anything, but I'd like to make sure we're not stepping outside the boundaries, so to speak.

Do we need to take this up at council meeting or can we get a response from AJ concerning this?

Todd/AJ,

I have reviewed the attached document and have the following questions/recommended changes:

- 1) On page 2 of the Agreement I am not sure what a "H & H" study is. I assume it has to do with development of the hydrologic flow and capacities.
- 2) On page 1 of Appendix A1 on paragraph 1.2.2, I suggest you end the sentence after the word data. Your plans may change on exactly how you get that done and we would not want to have to change this document for that.
- 3) On page 3 of Appendix A1, the paragraph with the 120 calendar day schedule discussed, just a note that we need to put the penalty for being late equal to the amount you guys would charge us if the contractor slips schedule.
- 4) On page 4 of Appendix A1 in section 1.13 add the construction time to the schedule. A question on the construction schedule- does the 120 days include the time to manufacture the pre cast culverts?
- 5) On page 1 of Appendix A2 under 2.4, delete the sentence Plumbing work is not anticipated, since we now know there will be some limited plumbing required.
- 6) On page 4 of Appendix A2 under 2.15 number 5. I thought the As Built Survey of existing construction equated to the 2.14.1 Investigation support. Why is it listed as not included Extra Work?

Todd, I am assuming that the two days per week of onsite support is an average and that the actual time will vary week to week. Please provide cost estimating back up data for hours and bid categories used for the estimate?

AJ, please review the attachment from a legal perspective. I would like to get this done this week if we can.

Regards,

Paul

Subject: Contract Agreement for Professional Services
Sent via: Info Exchange
Expiration Date: 11/9/2012
Remarks: Paul,

Attached is our contract agreement for professional services on West Cliff Drive and the FFB Conference Center. The total fees for our services are actually slightly lower than what was shown in the M3 Engineering Report. For both projects, the report had a total of \$126k for engineering and architecture fees and \$111k for construction phase services for a total of \$237k. Our agreement has \$134 for engineering and architecture fees and \$89k for construction phase services with a total of \$223k. This will allow us to add a few more items to the conference center scope if the roadway construction contract bids lower than our preliminary estimates. Please let me know if you have any questions on the scope and fee that is proposed in the agreement.

Todd

To: ffbrt@artelco.com
Subject: Act 833 funds for fire dept

You might see slow pay on Act 833 funds. FYI, and as a follow-up on some confusion about these funds that the Fire Department will receive from the County:

Fire Protection Premium Tax Funds / Act 833 of 1991 do have to be appropriated by the County. Since the early 90's they were considered "pass thru" monies and counties were given written authorization from the Division of Legislative Audit to treat them as such. We could simply receipt them into a Fire Protection Premium Tax Fund on the books of the county and issue a treasurer's check to the appropriate fire departments. **That practice was to be halted with the issuance of Attorney General Opinion No. 2012-007 early last year. That information was given to counties - but apparently some did not get it.**

Some of the questions that have been asked are:

1. Although the funds now have to be appropriated does a county have to follow the claims process or can the treasurer simply issue a treasurer's check to the fire departments?
2. Is a county required to establish a fund for each fire department or can a county simply have a Fire Protection Premium Tax Fund and issue the check to the various fire departments from that fund?
3. Is it lawful for counties to simply give the money to the fire departments or will the county be required to contract with them for services?

I will make an attempt to answer these questions as simply as possible - but nothing seems to be simple any more. It could be - they just won't let someone simple minded like me call the shots.

Here goes:

- The Fire Protection Premium Tax/Act 833 Funds do have to be appropriated according to AG Opinion No. 2012-007 using ACA 14-14-1102 as the authoritative law. ACA 14-14-1102 requires that conveyances from the county treasury be authorized by an appropriation ordinance. [We, of course, know that's not always the case. The treasurer acts as the trustee for many trust and agency accounts and other tax entities for which an appropriation is not required and the treasurer simply issues a check to the agency or tax entity for the funds on the books.] However, as of now this AG Opinion stands and is regarded as law by Legislative Audit unless challenged and overturned. **So counties must now appropriate the funds.**
- Because the Fire Protection Premium Tax funds now have to be appropriated they also need to be processed through the regular claims process. Legislative Audit believes that is what is intended in this ruling and that makes sense. If there is an appropriation then it will be included in the Appropriations Journal of the county clerk or comptroller. Going through the claims process will then provide the seamless avenue for the proper documentation to the appropriations journal.
- Should a separate fund be established for each fire department receiving these funds? **It is not yet necessary for the City to do so.** It is my understanding that this may have been suggested by some auditors in some counties but it is entirely unnecessary and is not a requirement of law. One fund - Fire Protection Premium Tax Fund - is completely ample for the receipt and disbursement of this money.
- Another problem addressed in the AG opinion was whether or not it is constitutional to give county money to the fire departments. [Article 12, Section 5 provides "no county, city, town or other municipal corporations, shall become a stockholder in any company, association, or corporation; or obtain or appropriate money for, or loan its credit to, any corporation, association, institution or individual."] If the fire department is a public or governmental department such as a county or municipal fire department - no problem exists. However, if the fire department is a private, nonprofit corporation there is a constitutional problem.....the one referenced above. A county cannot appropriate and simply give money to a private, nonprofit corporation. But, there is a fix. According to AG Opinion No. 1999-408, "Nothing in the constitution precludes the county from contracting with a private nonprofit charity, so long as the contract is supported by adequate consideration and serves a proper governmental end. Cities and counties clearly can enter into contracts that are supported by valid considerations." So some

counties may have to enter into contracts with some or all of their fire departments for "fire protection services" depending on the type of fire departments that you have. ***[This all seems ridiculous in what should be pass-thru money for an agency/trust account that the treasurer is serving as trustee.]***
